PERSONAL PROJECT EXPERIENCE

SmartCode – E-Commerce Web System (In Progress)

Self-initiated Project

I independently designed and developed a web-based e-commerce system named **SmartCode**, aimed at enabling online clothing sales. The system is currently still under development.

The project is built using modern web and backend technologies including Java, Spring Boot, PostgreSQL, Bootstrap, CSS, JavaScript, and jQuery.

Github link: <https://github.com/Witness-Coder/SmartCode>

Responsibilities / Contributions:

- Designed and developed an e-commerce web system for online clothing sales
- Implemented backend functionality using Java (Spring Boot)
- Designed and managed database structure using PostgreSQL
- Developed responsive user interfaces using Bootstrap, CSS, and JavaScript
- Implemented interactive features using jQuery

- Worked on product listing, user interaction, and system workflow design
- Continuously improving and adding new features to the system

Technologies Used: Java, Spring Boot, PostgreSQL, Bootstrap, CSS, JavaScript, jQuery

SOFTWARE KNOWLEDGE

- **Programming Languages:** Java, PHP, JavaScript
- **Backend Development:** Spring Boot
- **Frontend Development:** HTML, CSS, Bootstrap, jQuery
- **Databases:** PostgreSQL, MySQL
- **Version Control:** Git, GitHub
- **Web Development Tools:** STS (Spring Tool Suite), VS Code

LANGUAGE SKILLS

Fluent speaking and writing in English and Kiswahili
